

LEONARDO SLIM

THE NARROWEST ECLS TROLLEY
CERTIFIED FOR EASY
AND SAFE INTRA-HOSPITAL
TRANSPORT

THE LEONARDO Slim is a **stable and compact ECLS trolley** designed for convenient transport of ECMOLife through different hospital facilities. The minimized footprint allows ECMOLife operations also in very narrow environments. A unique and patented design, featuring a movable shelf to facilitate the placement and removal of the heater cooler and a wheel configuration aligned with the trolley profile, guarantees complete safety for patients and ease of use for healthcare professionals.

Intra-hospital Transport
